Open Elements	Cmd + Option + C	Browser viewport
Command Menu	Cmd + Shift + P	DevTools focused
Device mode	Cmd + Shift + M	DevTools focused
Current panel find	Cmd + F	Supported panel focused
Search resources	Cmd + Option + F	DevTools focused
Open source file	Cmd + P	DevTools focused
Hard reload	Cmd + Shift + R	Browser viewport
Clear Console	Cmd + K	Console focused
Network recording	Cmd + E	Network panel focused
Toggle Drawer	Esc	DevTools focused
Next DevTools panel	Cmd +]	DevTools focused

Remember

1. Shortcuts depend on the focused browser window or DevTools panel.
2. Inspecting a page changes the temporary browser view, not necessarily project source.
3. Device mode simulates a viewport; verify important behavior on a real device.
4. Keyboard layouts and Chrome updates can change available key combinations.
